Enterprise Security Summit - produced by Integration Developer News, is a multi-vendor online conference where top security experts discuss technologies and Best Practices to protect apps and data in today's new digital enterprise – across cloud, mobile, web and IoT.

Topics

- **Identity's Next Wave -** Delivering Business ROI. Leverage new capabilities for smart identity, access management to capture new revenues and business opportunities'.

- **Analytics Keep Apps, Data & Users Safe -** Go from insights-to-action faster with UBA, threat intelligence and machine learning. Thwart bots, fraud & cyber attacks in real-time.

- **Strong CyberSecurity for Web & Cloud -** Use encryption, IRM, keys, SSL, SSO and tokens to protect web apps, websites, commerce and cloud from the next cyber attack.

- **Iron-Clad API Security -** Clamp-down completely on API intrusion or nefarious use. Keep API performance high; API innovations flowing.

- **Data-Centric Security Advances -** One way to secure data-in-use is just to not expose or move it unnecessarily. See the latest in data encryption, tokenization and virtualization.
