Exploring 2019's Top Cloud Architecture Trends

- **Cloud Powers End-to-End Digital Transformation**

Learn how you cut complexity for cloud-centric digital transformation projects with modern converged and unified cloud platforms.

- **The New Age of iPaaS**

Many firm began with cloud by integrating SaaS with on-prem systems. The Integration Platform as a Service (iPaaS) and APIs were crucial. We explore the 2019-gen iPaaS.

- **Hybrid Integration for the Cloud-Driven Enterprise**

Hybrid cloud adoption requires attention to the entire stack – from apps, business logic, data, resiliency and high-availability and management. We explore top success factors.

- **Successful Cloud-Driven Business Innovation**

The cloud is opening new opportunities for revenue and business models. We explore analytics, AI/ML, B2B, Blockchain, and IoT/Edge.

- **Modernize Legacy Assets for a Cloud Future**

Many companies moving to cloud also want to leverage their on-prem assets. We examine proven and emerging tools and practices.

- **Cloud-Centric Apps – Build, Monitor and Manage**

Cloud-native apps and DevOps processes are at the heart of many cloud projects. We look at how team deploy efficiently, monitor in real-time and manage at mega-scale.

Action - Activate your Data

Agenda

With cloud-driven Digital Transformation, firms looking to innovate need to integrate

How Action DataConnect unifies cloud architectures with enterprise apps and data

Tour of Action's support for APIs, ODBC/JDBC, microservices, containers, Kubernetes and more

Downloads

Action DataConnect 11 - Architected for Next-Gen Hybrid Integration

Top 10 Use Cases for Integration-Platform as-a-Service (iPaaS)

Action + TDWI: A Step-by-Step Guide to Adopting a Hybrid Integration Platform

Action DataConnect - Quickly Build Integrations

Action DataConnect Integration Manager - Centrally Manage and Monitor Integrations

Hidden Costs of Hand-Coding Your Integration

Greg Coates

Director of Product Management
for Data Integration

Nine Cloud and Data Market Trends to Watch

Agenda

Even as cloud architecture permeates businesses, not all projects capture big ROI

Highlight the 2019 cloud trends making the most impact on IT and business

Attunity Demo. See real-time data with the cloud

Downloads

Gartner - Enabling DataOps for Analytics

Attunity Data Integration Solution for Streaming Data Pipeline

Bloor - Attunity Compose Data Warehouse Automation

Eckerson Group - DataOps: Industrializing Data and Analytics

Eckerson Group - Deep Dive on Data Warehouse Automation

Clive Bearman

Director of Product Marketing
Attunity, a division of Qlik's

Future Trends of the Connected Business with AI, Blockchain & Edge

Agenda

Cloud has become core hub for the connected business - rather than simply a target or source

How cloud is powering enterprise adoption of AI, blockchain and IoT/edge

Introduction and drill down into Boomi Platform

Downloads

Conquering Technical Debt: 5 Ways CIOs Can Drive Digital Transformation

Novartis Uses Dell Boomi To Simplify Integration, Increase Time-to-Value

The Transformative Enterprise Architect

Reinventing the Integration Center of Excellence

Put Agile Integration at the Center of IT Architectural Transformation

Dell Boomi for Integration & Low-Code App Development

Mike Bachman

Global Architect &
Principal Technologist

Integration Modernization and the Agile Integration Approach

Agenda

Power ways to leverage Agile Development + Agile Integration for cloud projects

Ensure apps easily access data and services they need

IBM + Red Hat demo of Cloud Pak for Integration

Downloads

Ovum: Hybrid Integration Platforms:
Integration Modernization and Greater Agility
Agile Integration Methodology
IBM Cloud Pak for Integration

Ken Parmelee

Dir, Cloud Pak for
Integration

Why Your Cloud Architecture Needs a Time Series Platform

Agenda

Cloud architectures deliver performance and scale but require new monitoring strategy

Legacy monitoring fall short on many fronts - granularity, ingest and queries

How time series fills the gaps. Capture metrics from apps, containers and Kubernetes pods & nodes

Downloads

Kubernetes Monitoring Solution

5 Reasons To Think Beyond SaaS Monitoring Solutions

How Houghton Mifflin Harcourt Gets Real Time Views into AWS

Securing Cloud-Native Workloads with Aporeto and InfluxData

APM Using the InfluxDB Time Series Platform

Thom Crowe
Community Manager

iPaaS for Citizen Integrators

Agenda

How cloud technologies can reduce a team's backlog, accelerate projects

The power of the "citizen integrator" -- and what it takes to empower such workers.

Review and demo of webmethod.io cloud-based iPaaS
