How To Design, Launch and Update Apps for Digital Business in 2019

Microservices, APIs, Cloud & Containers
2019 trends in new-gen architectures to help you 'cross the chasm' more quickly and easily.

Enterprise-Class DevOps, DevSecOps
Better align developers and IT ops to deliver a speedier and more impact app lifecycle.

AI, Machine Learning for Smarter, Stickier Apps
Use AI/ML to improve testing, enhance user experience, tighten security & compliance and more.

Manage Apps for Real-Time Business
Tap into deeper data for responsive, scalable and impactful hybrid, cloud apps.

Latest App Models and Methods
RPA, cloud-native, low-code, Progressive Web Apps, serverless, dynamic business rules.
